## READY FOR MORE

Stellar – the lighting control app from ARRI – provides a smart and innovative way to control professional lighting and is available on iOS and Android phones and tablets. Stellar reimagines lighting control by automatically taking care of complex DMX settings and by featuring control interfaces with beautifully designed graphics. Coded intelligence and advanced communication make connecting ARRI SkyPanel, L-Series and third party fixtures to the app simple and straightforward. After using Stellar, it will be difficult to go back to controlling lights in any other way.
